

FREELANCER'S HUB

Date: 09/02/2019

Guide: Mr.Rony Tom

TABLES

Table no. :1

Table name: login

Primary key: login_id

Foreign key: reg_id references reg_tb

Field Name	Data Type	Description
login_id	int(11)	Uniquely identify
username	varchar(50)	Username for login
password	varchar(100)	Password for login
user_type	varchar(20)	Type of the registered user
status	tinyint(4)	Whether the user is approved or rejected

Table no. :2

Table name: outsourcer_reg_tb

Primary key: id

Field Name	Data Type	Description
id	int(11)	Uniquely identify
name	varchar(20)	Name of the outsourcer
dob	Date	Dob of the outsourcer
address	varchar(50)	Address of the outsourcer
place	varchar(50)	Place of the outsourcer
phone	bigint(11)	Mobile number of the outsourcer

email	varchar(50)	Email of the outsourcer
username	varchar(20)	Username of the outsourcer
status	int(11)	Whether the outsourcer is approved or rejected

Table no. :3

Table name: freelancer_reg_tb

Primary key: id

Field Name	Data Type	Description
id	int(11)	Uniquely identify
fname	varchar(20)	First Name of the freelancer
lname	varchar(20)	Last Name of the freelancer
dob	Date	Dob of the freelancer
address	varchar(50)	Address of the freelancer
place	varchar(20)	Place of the freelancer
qualification	varchar(20)	Qualification of the freelancer
phone	bigint(11)	Mobile number of the freelancer
mail	varchar(250)	Email of the freelancer
image	varchar(50)	Image of the freelancer
username	varchar(25)	Username of the freelancer
status	varchar(50)	Whether the freelancer is approved or

Table no. :4

Table name: userpost

Primary key:postid

Foreign key:user id references outsourcer_reg_tb

Field Name	Data Type	Description
postid	int(11)	Uniquely identify
title	varchar(25)	Title of the user post
date	Timestamp	Date of uploaded user's post
platform	varchar(20)	Platform deatails
requirement	varchar(255)	User requirements
duration	varchar(20)	Deadline of the project

Table No: 5

Table name: tender_tb

Primary key:id

Foreign key: userid references outsourcer_reg_tb

programmerid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
topic	varchar(25)	Title of the user post
cost	int(11)	Demanding cost for the project
reply	varchar(50)	Comments

Table no. :6

Table name: project

Primary key:id

Foreign key: pid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
preproject	varchar(35)	Previous project details
platform	varchar(25)	Platform details
programming_language	varchar(25)	Programming language
db	varchar(20)	Database details
link	varchar(255)	url of the project
image	varchar(255)	Uploading image details

Table no. :7

Table name: post_id

Primary key:id

Field Name	Data Type	Description
Id	int(11)	Uniquely identify
userpost	varchar(50)	Title of the userpost

Table no. :8

Table name: freelancer_tb

Primary key:id

Field Name	Data Type	Description
id	int(11)	Uniquely identify
freelancer	varchar(20)	Name of the freelancer
postid	int(11)	Uniquely identify the userpost

Table no. :9

Table name: tendertender_tb

Primary key:id

Foreign key: freelancerid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
msg	varchar(55)	Comments by freelancer

Table no. :10

Table name: freelancer_ajax

Primary key:id

Field Name	Data Type	Description
id	int(11)	Uniquely identify
freelancer	varchar(50)	Name of the freelancer

Table no. :11

Table name: project_ajax

Primary key:id

Foreign key: freelancerid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
project	varchar(255)	Title of the previous projects

Table no. :12

Table name: notify

Primary key:id

Foreign key: uid references outsourcer_reg_tb

pid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
des	varchar(100)	Notification from outsourcer
status	int(11)	Whether it is approved or rejected

Table no. :13

Table name: agreement

Primary key:id

Foreign key: uid references outsourcer_reg_tb

pid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
agreement	varchar(500)	Upload agreement by freelancer
date	timestamp	Uploaded date
stsatus	varchar(50)	Whether it is approved or rejected

Table no. :14

Table name: chat

Primary key:chatdetail_id

Foreign key: userid references outsourcer_reg_tb

Programmerid references freelancer_reg_tb

Chat_id references chatadmin

Field Name	Data Type	Description
chatdetail_id	int(11)	Uniquely identify
cdatetime	timestamp	Date
message	varchar(50)	Message details

Table no. :15

Table name: chatadmin

Primary key:chat_id

Foreign key: user_id _from references outsourcer_ reg_tb

programmer_id _to references freelancer_ reg_tb

Field Name	Data Type	Description
chat_id	int(11)	Uniquely identify the chat details

Table no. :16

Table name: chatprogrammer

Primary key:chat_id

Foreign key: user_id _to references outsourcer_ reg_tb

programmer_id _from references freelancer_ reg_tb

Field Name	Data Type	Description
chat_id	int(11)	Uniquely identify
date	timestamp	Date
message	varchar(255)	Message details

Table no. :17

Table name: chatuser

Primary key:chat_id

Foreign key: user_id _to references outsourcer_ reg_tb

programmer_id _from references freelancer_ reg_tb

Field Name	Data Type	Description
chat_id	int(11)	Uniquely identify
date	timestamp	Date
message	varchar(255)	Message details

Table no. :18

Table name: bank

Primary key:bank_id

Foreign key: reg_id references freelancer_ reg_tb

Field Name	Data Type	Description
bank_id	int(11)	Uniquely identify the chat details
amount	int(11)	Amount details
bank	varchar(50)	Bank details
card	bigint(11)	Card details
cvv	int(11)	CVV number

Table no. :19

Table name: feedback

Primary key:id

Foreign key: pid references freelancer_reg_tb

uid references outsourcer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
description	varchar(100)	Feedback from outsourcer
status	int(11)	Whether it is approved or rejected

Table no. :20

Table name: student_reg_tb

Primary key: id

Field Name	Data Type	Description
id	int(11)	Uniquely identify
name	varchar(20)	Name of the student
age	varchar(50)	Age of the student
qualification	varchar(50)	Qualification of the student
phone	bigint(11)	Mobile number of the student
email	varchar(50)	Email of the student
username	varchar(20)	Username of the student
status	int(11)	Whether the student is approved or rejected

Table no. :21

Table name: questions_tb

Primary key:qid

Foreign key: sid references student_reg_tb

Field Name	Data Type	Description
qid	int(11)	Uniquely identify
questions	varchar(100)	Ask questions by student
status	int(11)	Whether it is approved or rejected

Table no. :22

Table name: codes_tb

Primary key:cid

Foreign key: sid references student_reg_tb

Field Name	Data Type	Description
cid	int(11)	Uniquely identify
codes	varchar(100)	Upload codes by student
status	int(11)	Whether it is approved or rejected

Table no. :23

Table name: reply_question_tb

Primary key:rid

Foreign key: sid references student_reg_tb

pid references freelancer_reg_tb

qid references question_tb

Field Name	Data Type	Description
rid	int(11)	Uniquely identify
reply	varchar(100)	Answer the questions by freelancer
status	int(11)	Whether it is approved or rejected

Table no. :24

Table name: tutorial_tb

Primary key:id

Foreign key: pid references freelancer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
tutorial	varchar(100)	Upload tutorials by freelancer
status	int(11)	Whether it is approved or rejected

Table no. :25

Table name: complaint

Primary key:id

Foreign key: pid references freelancer_reg_tb

uid references outsourcer_reg_tb

Field Name	Data Type	Description
id	int(11)	Uniquely identify
description	varchar(100)	Complaint from outsourcer
status	int(11)	Whether it is approved or rejected
